### PROFESSIONAL EXPERIENCE

#### Product Developer

JULY 2026 - PRESENT

Opera Software / Wrocław, Poland

- Build internal, non-public tooling with an AI and agentic development focus.
- Keep product, roadmap and implementation details confidential.

#### Software Engineer

JAN 2023 - JULY 2026

Opera Software / Wrocław, Poland

- Developed browser extensions with Opera's crypto wallet team.
- Owned automation and scripting across the development workflow.
- Handled CI/CD and DevOps work supporting builds and releases.

#### QA Automation Engineer

AUG 2021 - DEC 2022

Opera Software / Wrocław, Poland

- Built browser test automation with Selenium, Python and pytest.
- Supported test planning and quality throughout release cycles.

### SELECTED FOUNDER WORK

#### GKD Agency

Independent studio with its first client work. The live portfolio carries current project details: [gkd.agency](https://gkd.agency)

#### Skrzynka Spółdzielni

Housing-cooperative operations product with an MVP and go-to-market strategy in active development: [skrzynka-spoldzielni.com](https://skrzynka-spoldzielni.com)

### ROLE FOCUS

Product Engineer / Product Developer / Frontend-heavy Full-Stack Engineer / Forward Deployed Engineer / Solutions Engineer

### WHAT I BRING

- Product thinking: clarify users, constraints, scope and trade-offs before implementation.
- Frontend architecture: build accessible interfaces with maintainable component boundaries.
- Automation and reliability: shorten feedback loops through practical testing and automation.
- Full-cycle ownership: stay involved from discovery through release and maintenance.
- Communication: keep decisions, risks and delivery state clear for every collaborator.
